TPE wheels - Colson Caster Corp.

Appears in Print As: **TPE wheels**

SEPTEMBER 25, 2009 **Denise Greco**

Trans-forma HD series wheels' waffle-design polyolefin wheel cores are chemically bonded to thermoplastic elastomer (TPE) treads for higher durometers than previous Trans-forma models. The TPE resists water damage from hydrolysis, supports heavy loads for long periods without flat spotting, and glides quietly while protecting surfaces.

The wheels come in 4, 5 and 6-in. diameters with 2-in.-wide treads. They support weights from 600 to 900 lb, depending on wheel diameter. A range of bearing options is available.

Colson Caster Corp., 3700 Airport Rd., Jonesboro, AR 72401, (800) 643-5515, www.colsoncaster.com
