

## **COLSON ROLLS OUT HIGH TEMPERATURE AND COST-EFFECTIVE THERMOPLASTIC ELASTOMER WHEELS**

### *Newest Wheel Product is Corrosion and Maintenance Free*

**Jonesboro, Arkansas, August 5, 2009** – Colson Caster Corporation, the world’s leading manufacturer of standard and custom application caster and wheel products, today announced a new addition to its 2 Series wheel product group - the TPE HI-TEMP wheel. Built with an easy running, heat resistant exterior, the new wheel is designed for applications where moderate to high temperature and washing and steaming environments may be the norm.

“The entire construction of the wheel dictates worry free hardiness and operation,” said Charles Harris, engineering manager at Colson. “We have not only crafted its elements with the toughest materials, but also joined them together with the most advanced bonding and sealing technologies.”

Thoroughly tested in Colson’s own engineering labs, the thermoplastic elastomer (TPE) tread material on the TPE HI-TEMP wheel is chemically bonded to a tough and environmentally sound polyolefin core. This combination of corrosion-free, heavy-duty materials and hearty package design make the wheel perfect for medical and food processing environments requiring strength and durability during washing operations and hot, wet clean-ups. In addition, the wheels feature a single insert, molded and sealed, stainless steel precision ball bearing with a white, glass-filled nylon thread guard for years of maintenance-free, dependable wear.

The new TPE-HI-TEMP wheel can facilitate up to 350 total pounds of weight load and is available now in 3, 3 ½, 4, 5, and 6 inch wheel diameters, each with a 1 ¼ inch tread width. For pricing and more information on the TPE-HI-TEMP wheel, or any Colson product, call 1-800-643-5515, or email [info1@colsoncaster.com](mailto:info1@colsoncaster.com).

### **About Colson Caster Corporation**

For more than a century, Colson Caster Corporation has been providing the world with the highest quality and largest selection of premier caster and wheel products. Headquartered in Jonesboro, Arkansas for the last 50 years, and with more than 150,000 square feet of state-of-the-art manufacturing space, Colson designs and produces the industry’s largest selection of casters and wheel products, caster options, and accessories. The company is the leader in caster innovation and builds exclusive caster products for all of the world’s markets. For more information, visit [www.colsoncaster.com](http://www.colsoncaster.com).
